Materials

Anima Hookahs are designed from highly durable, quality materials. During the development, we emphasized cooperation with masters from many fields, feeling this was the only way to create a smart, highly functional product with a sense for detail and craftsmanship.

All our materials and components are carefully selected and manufactured by local masters of crafts in the Czech Republic.

The combination of the aluminium, stainless steel and handmade porcelain creates a unique synergy in functionality and elegance.

Czech crystal is blown in traditional Czech glassworks with a long history. Thanks to this, we can guarantee the high aesthetic value of Anima vases and the variety in our designs.
